1. IDE Techno 3

1. IDE Techno

Arduino IDE identical to the original version 1.5.8, but enriched with programs and libraries so teachers get a ready-to-use environment to:

- install *FirmataPlus* and drive hardware from **Scratch2** using **s2a**
- install the *firmware* from *Makeblock* and drive hardware from **Scratchbot**
- install the *shellMega* or *Uno* shells for communication with **Organigram** from [TechnoZone51](#)
- run an enriched **Ardublock** build, including parts from [DuinoEdu](#) and [Makeblock](#)
